Spring 2023

CET ACADEMIC PROGRAMS   **Amman, JO**
Intensive Modern Standard Arabic and Jordanian Dialect

EXPERIENCE
Summer 2023

Abnormal Security   **New York City, NY**
Software Engineering Intern
- Implemented OpenCost, an open-source project, within a machine learning-based email security ecosystem to manage and optimize $100k+ in Azure and AWS cloud spending, resulting in a 20% increase in cost visibility and more efficient resource allocation for machine learning workloads
- Collaborated with product managers across multiple platform and product teams to analyze how cloud infrastructure spending impacts their projects and KPIs, leading to more targeted budget allocation and a 15% increase in ROI for cloud-based initiatives and platform development
- Authored comprehensive documentation and maintenance guidelines for the OpenCost open-source project, leading to a 25% decrease in developer time spent on cloud infrastructure spending

Summer 2022

Quantcast   **San Francisco, CA**
Software Engineering Intern
- Architected feature managing deployment of developer projects to Amazon Web Services, resulting in 200% efficiency improvement in production, staging, and testing migration speed
- Constructed 4-month roadmap for rollout of infrastructure applications by meeting with VP of Infrastructure Engineering and DevOps, exceeding management timeline expectations by 25%
- Composed feedback from senior developers and product managers across infrastructure engineering teams to adjust team strategy, leading to the reprioritization of 3 internal projects

Summer 2021

Battery Ventures   **Boston, MA**
Summer Analyst
- Developed investment theses and pitched potential investment opportunities to senior leadership including General Partners which provided 15 investment opportunities across 3 industry verticals
- Led initial due diligence on 50+ early- and growth-stage companies in global payroll systems industry to construct a market landscape report, resulting in increased focus on industry by firm VP
- Built and evaluated distribution waterfall model for 6 early-stage companies, accelerating early-stage due-diligence processes and resulting in 2 secondary calls with prospective investments

Summer 2020

GoGetDoc   **San Mateo, CA**
Product Management Intern
- Collaborated with lead product manager conducting research on pay-over-time product with underwriting, checkout, and provider portal features, leading growth to $20M+ in sales volume
- Drafted product requirement document outlining software implementation of payment portal, streamlining patient experience within the GoGetDoc app suite used by 2M+ users
- Redesigned and simplified signup and login flows for patient acquisition through new UI/UX models in Figma, resulting in a 16% increase in new user reach and return member conversion

ADDITIONAL

- Enjoy searching for cliff jumping spots around the world; backflipped off 50ft cliff
- Former Time for Kids reporter; interviewed Shigeru Miyamoto, creator of Mario
- Interested in building and flying First-Person-View drones freestyle videography
